

HOW TO SEARCH FOR AN INTERNATIONAL COMPANY CREDIT REPORT

Searching for a Creditsafe online international company report.

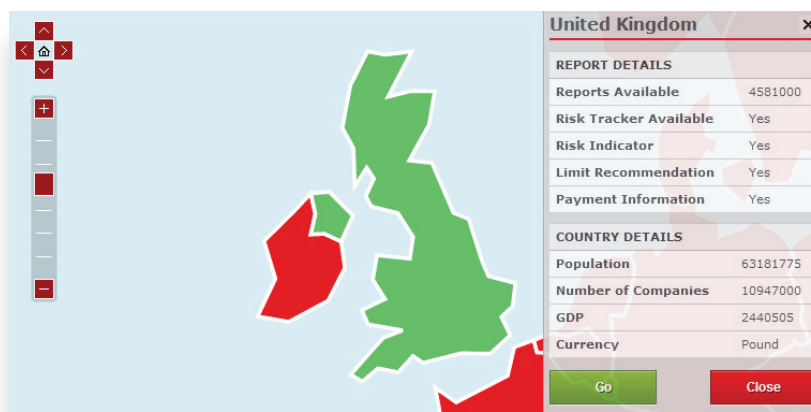

The Creditsafe map shows countries that have online reports available in red. There are 39 countries with over 120 million reports available instantly online. If you wish to find a company report from a country outside of the instant online (red) countries you can put in a request for the report which will be available to view online within 2 – 10 working day (see page 4 for details)

To search for an international company simply find the country in the map and select it. If you cannot find the country you are looking for you can select it from the 'Select a country' box above the map.

When you click on a country in the map it will provide you with more information on the country. In order to continue to search for a company click the 'Go' button.

As business information experts we strive to provide the highest standards of quality, therefore we would like to inform you that the level of information within our international reports is dependent of the filing requirements of the country being searched. As the content of the reports is beyond our control we are unable to guarantee that it will be comparable to our domestic credit reports. Please take this into account before selecting your search criteria as we are unable to offer refund on international reports that are ordered.
